We do not have any standards for tanks.

Subject: Falcon Refinery

Heidi:

If the tanks at this facility were regulated by RRC, do you guys have any standards for construction?

- 1. Cathodic Protection Requirements**
- 2. Liner below Tank Bottom**
- 3. Leak Detection System**
- 4. Other Corrosion Standards**
- 5. Anything else**

What are the minimum standards for tank construction in Texas?

Thanks

Gary Moore
